 - CSLF Policy Group San Francisco: 29 - 30 June
 - G8 Heads of State Meeting Italy 8 -10 July
 - CSLF Ministerial Meeting London:14 Oct
 - IEA Ministerial Meeting Paris: 16 Oct

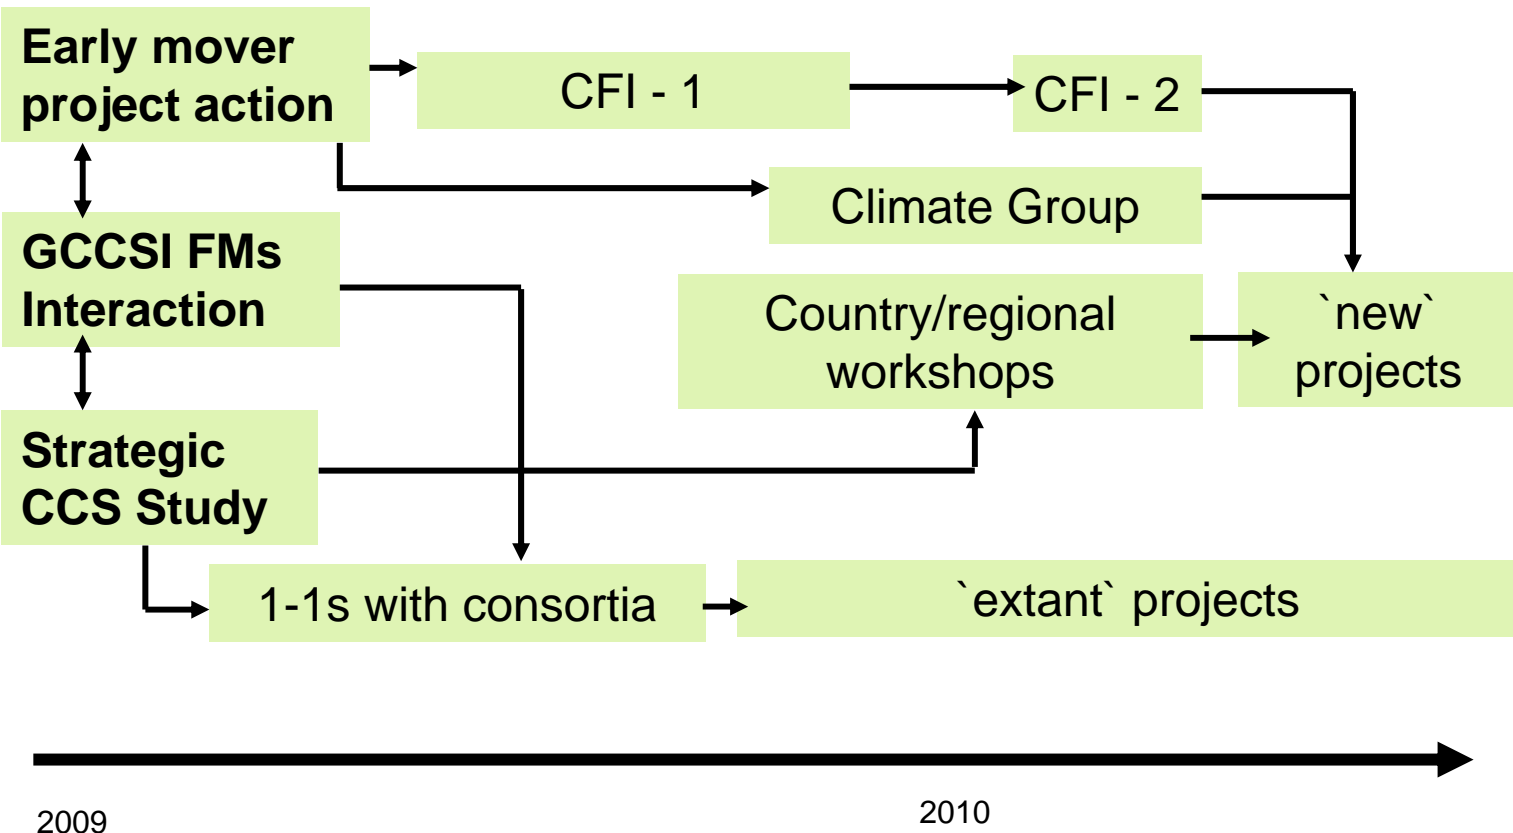

The Way Forward: Longer term targets and aspirations

Beyond 2009 the GCCSI will work to a longer term plan that complements and advances the GCCSI early activity on CCS projects.

- Driving development of CCS demonstration projects:
 - **Year 1:** Identify and secure first mover CCS projects and actively engage with and support identified CCS projects
 - **Year 3:** Identify and secure further suite of CCS projects towards the 20 G8 CCS projects and initiate consortia to develop potential CCS projects
 - **Year 5:** Actively support further strategic projects beyond the G8 20 CCS projects

Immediate Work Programme: Accelerating demonstration projects

Supporting and capacity building action

Nº of Projects

Supporting CCS uptake globally

- **Year 1:** Identify regulatory impediments to CCS deployment; established economic cost of CCS, ongoing support of research and community outreach activities
- **Year 3:** Influence establishment of supportive regulatory frameworks and carbon value mechanisms, established trusted presence in public debate on CCS
- **Year 5:** Significant inroads into winning public acceptance and community understand of CCS projects, transfer R&D from pilot projects into commercial scale projects

Building CCS capability

- **Year 1:** Position GCCSI as a global CCS expert and information source
- **Year 3:** Consolidate position as an authoritative and independent body providing projects with advice on best practice regulation, legal development and reform, and develop a suite of materials to assist projects, inform the public and provide guidance
- **Year 5:** Position the GCCSI as the market leader on CCS information

An Australian Government Initiative

Way Forward: Business 'build' and staff issues
